Forecast for Friday 11 Feb 2022

Weather: A mostly clear night and then a sunny start, but chilly with a frost. Some cloud bubbling up during the day to bring the odd shower in the afternoon and high cloud will gradually increase from the west. Cloud increasing and lowering in evening to bring some rain, this falling as snow on the tops.

Chance of cloud-free hill tops above 600m: 90%, but 50% late evening.

Low cloud and visibility: Mainly good visibility, with only fleeting patches of cloud above 600m, though possibly broken down to 500m in a shower and broken cloud late evening down to 500m, will bring poorer visibility.

Forecast for Saturday 12 Feb 2022

Weather: Cloud thickening overnight with occasional rain, falling as snow on the tops in the early hours. Then a cloudy day with patchy rain in morning then heavier and more persistent rain in the afternoon with a good deal of hill fog onto western slopes. Clearing to a few showers through the evening with cloud becoming more broken.

Maximum wind: Southwest 30-35 gust 45, but 50 gust 65mph possible over higher tops. Turning more westerly in evening and decreasing 25-30 gust 40mph,

Chance of cloud-free hill tops above 600m: 40 or 50% in morning and again late evening, otherwise 10%

Low cloud and visibility: Moderate or good, but poor in heavier rain at times and poor or very poor in cloud, broken cloud layers at first above 600m and again late evening, but extensive down to 500-600m by the afternoon though widely down to 400m onto western slopes.

Temperature: **Valleys:** Plus 3 C rising to plus 7 C.
At 600m: Zero C in early hours, rising to plus 3 C by morning and plus 5 C in afternoon
Freezing level: Rising above the tops by morning.
